

# DIRECT ENERGY WEAPONS AGENCY, INC

## DEW Agency

To help raise awareness, educate & protect American Civilians from Criminal, Illegal use of Direct Energy, Microwave, Pulsed, Neuro & Acoustic Weapons.

## Havana Syndrome

Support organization for Havana Syndrome Victims.

## DEW School

To Inform and educate peace officers, security personnel, etc. about the many types of Direct Energy Weapons.

Raise public awareness about Direct Energy Weapons and the injuries they cause

[www.DEWAGENCY.org](http://www.DEWAGENCY.org)

**Twitter -** DewPolice

## Hello from DEW Agency

Direct Energy Weapons Agency has undergone a few changes. We welcomed a new team / Board Members to advise and help DEW Agency continue to grow and operate productively.

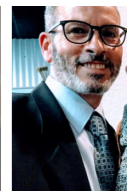

Ms. Michael Wright-Hodges

Mr. Aaron Smith

Ms. Allison Smith

Mr. Ediberto Crespo

Ms. Darlene Pech

Direct Energy Weapons Agency, Inc.

# DEW Police

To investigate, apprehend & arrest Terrorists / Criminal users of Direct Energy Weapons.

To process reports of Direct  
Energy, Microwave, Neuro  
and Acoustic Weapons  
harassment and torture.

## Neuro Enforcement

To help protect the  
general public from body  
& mind-control weapons  
& technology.

To help investigate & stop  
CRIMINAL use of  
neuroweapons,  
neurotechnology

To perform periodic inspections to ensure technological devices, games, medical devices, etc. that are sold to the public are SAFE and not criminally controlling users thoughts = actions.

There are a few tasks on our list. The primary is getting an exact National count of American VICTIMS that have been harassed and/or tortured by stolen, homemade, illegal Direct Energy, Microwave, Neuro and/or Acoustic Weapons. By visiting [www.DewPolice.com](http://www.DewPolice.com) VICTIMs can either download the form, fill it out, scan and email it back to us OR copy and paste the questions in the body of their email, then send to us. Results will be shared with CIA, FBI & Department of Defense.

QUESTIONS - Copy and paste in email:

- Your Name
- State
- Address:
- Tel#
- Email:
- Does this VICTIM know who it is?
- Who is He, She or They?
- Type of attacks:
- How long?
- “BRIEF” description:

### Direct Energy Weapons Police (DEW Police)

Citizens Complaint Form

Email completed form to: [info@dewagency.org](mailto:info@dewagency.org) or copy and paste questions.

Name: \_\_\_\_\_

- STATE: \_\_\_\_\_
- Address: \_\_\_\_\_
- Tel# \_\_\_\_\_
- Email: \_\_\_\_\_
- Does this VICTIM know who it is? \_\_\_\_\_
  - Who is He, She or They? \_\_\_\_\_
  - \_\_\_\_\_
  - \_\_\_\_\_
- Type of attacks: \_\_\_\_\_
  - \_\_\_\_\_
  - \_\_\_\_\_
- How long? \_\_\_\_\_
- Brief description: \_\_\_\_\_

**SOURCE:** Ms. Alison Smith, Director, Direct Energy Weapons Agency, Inc.

**BLOOD TESTS & HOME TEST KITS FOR VICTIMS OF Criminal Use of Direct Energy, Microwave, Neuro & Acoustic Weapons.**

**BLOODS:**

**ERYTHROCYTE SEDIMENTATION RATE - ESR**

Tests for Inflammation throughout the body, Cancer & Infection. High rates are often related to Infections & Malignant diseases. Dysregulations in immune responses lead to chronic inflammation which may result in further tissue damage. Can be from symptoms of radiation exposure.

**CREATINE KINASE ISOENZYMES - CPK, CK, Total CK, Creatine Phosphokinase**

CK is an enzyme found in the heart, brain, skeletal muscle, and other tissues. It is released into the blood when there is muscle damage. General CK tests will show any damage & isoenzymes test can locate where the damage is in the body. The damage can be caused by radiation & direct attacks to various parts of the body.

**CARBON MONOXIDE / CARBOXYHEMOGLOBIN - COHB / CARBOXY**

Carbon monoxide is a gas. Exposure to it is normal. But too much of it can cause poisoning. When poisoned the body swaps oxygen in your red blood cells with carbon monoxide. It leads to damage. Symptoms are dull headache, weakness, nausea, vomiting, dizziness, difficulty breathing, fainting. This can be resulted from radiation exposure & direct poisoning via Hydrogel sensors in the bloodstream. Carbon monoxide may form as the Polymers on the sensors of Hydrogels break-down in the body.

**SJORGENS / RHEUMATOID FACTOR - SSA / SSB**

Used to diagnose Sjogren's syndrome and rheumatoid arthritis. Sjogren's syndrome is caused by the immune system mistakenly attacking the body. It mainly affects areas that produce fluids like tears or saliva resulting in symptoms such as a dry mouth & eyes. This can be as a result of symptoms of radiation exposure.

**CHOLINESTERASE - PLASMA & OR RED CELL - CHOL / CHS**

Two types of blood. True - acetylcholinesterase in red cells / Pseudocholinesterase acylcholine acylhydrolase in serum. The test looks at levels of 2 substances that help the nervous system work properly, your nerves need these substances to send signals. They are called acetylcholinesterase and pseudocholinesterase. Your nerves need these substances to send signals Cholinesterase testing has two main uses: To detect organophosphate pesticide exposure and poisoning. Cholinesterase is a family of enzymes present in the central nervous system, particularly in nervous tissue, muscle and red cells. Due to the fact that attacks need to be sent to the Nervous System in order to take effect on a victim, levels of Cholinesterase can be decreased & function is impaired. Levels decrease due to exposure to insecticides. It is for inactivating acetylcholinesterase at nerve endings Causes system dysfunction. This test can be used to evaluate Nano particles which may interfere with the functioning of these nervous system substances.

**METHYLMALONIC ACID - MMA**

Detects vitamin B12 deficiency. Your body makes large amounts of Methylmalonic Acid when you have a drop in the amount of vitamin B-12. When Proteins break down it is produced as a reaction & is excreted through your kidneys. A deficiency in B12 can be linked to radiation exposure.

**CEA - CARCINOEMBRYONIC ANTIGEN**

A blood test used to help diagnose and manage certain types of cancers.

Carcinogens are substances or exposures that can cause cancer. Examples include home and workplace chemicals, environmental or medical radiation, smoke, and even some viruses and medications. High levels can lead to infection, cirrhosis of the liver, and inflammatory bowel disease.

This is a test to determine if you have cancer, it may not give evidence of an attack but will put your mind at ease.

**HOMOCYSTEINE -**

Homocysteine is an amino acid used by the body to make protein and build and maintain tissue. Excessive homocysteine levels in the blood may damage artery walls & form blood clots, increase the risk of stroke, certain types of heart disease and disease of the blood vessels of the arms, legs and feet. These tests are useful in accompaniment with Methylmalonic Acid tests, and diagnose vitamin B12 & folic acid deficiency. Amino Acids & their functioning can be harmed by radiation.

**ANA- ANTINUCLEAR ANTIBODIES -**

Anti-nuclear antibodies are autoantibodies considered an indication of systemic autoimmune diseases which can be caused by radiation exposure. It is a group of antibodies produced in the immune system when it fails. They attack the body's cells, causing tissue and organ inflammation, joint and muscle pain, and fatigue. Linked to autoimmune disorders such as rheumatoid arthritis, scleroderma and Sjogren's syndrome & lupus. The test is used as an initial screen to assess the need for more specific tests (ENA and anti-DNA antibodies)

**ANTI DS DNA - LUPAS - anti-double stranded DNA**

Lupus is an Autoimmune disorder that occurs when your body's immune system attacks your own tissues and organs. It can cause problems with your skin, joints, kidneys and other organs. The anti-dsDNA antibody test is a very specific test for Systemic Lupus Erythematosus (SLE) because Anti-dsDNA antibodies aren't found in any other autoimmune disorders.

**TROPONIN I & TROPONIN T - TNI & TNT -**

Measures levels of troponin T or I proteins in the blood. Released when the heart is damaged, ex-ample - heart attack. The more damage the more troponin T and I there will be in the blood. These Troponin blood tests are now considered an alternative to Creatine Kinase Isoenzymes blood tests. This can be as a result of radiation exposure & from direct attacks to the Heart.

**PROTEIN TESTS -**

The major effect of radiation on the cell is the disruption of the DNA strand. With the DNA structure damaged, the cell cannot reproduce in its normal fashion. Protein synthesis is affected, as are a number of processes necessary for proper cell function. One common effect is the generation of cancer cells. Errors in protein synthesis disrupt cellular fitness, cause diseases, Protein deficiency, infection risk, loss of muscle mass & autoimmune disorders such as Lupus.

A symptom is your immune system mistakenly creates antibodies that make your blood much more likely to clot. High risk of leg clots - Deep vein Thrombosis which can also travel through the blood-stream & affect the lungs. It can also cause blood clots in the brain & is normally a genetic disorder.

Autoimmune diseases induced by radiation can cause cancer. This test can help prove your being attacked.

**PROTEIN C ACTIVITY & PROTEIN C ACTIVITY -**

The Activity tests are usually done first & if there is a deficiency Antigen tests are then done.

**PROTEIN C ANTIGEN & PROTEIN S ANTIGEN ACTIVITY -**

This test measures the level of protein C in your blood. Protein C helps your blood clot normally. If you have too little protein C (protein C deficiency), it means that your blood may clot too much.

**PROTEIN S FREE & PROTEIN S TOTAL -**

Antigen testing is appropriate when a functional activity deficiency is present. If low, Total Protein S Antigen assesses the Protein S deficiency as either Type I or III (IIa). Type II (IIb) Protein S deficiency has normal concentrations of Total and Free Protein S Antigen.

**URINE & HAIR TESTS KITS -**

Toxic Elements Screen / Toxic Metals / Toxic & Essential Elements -

Detects toxic metals exposure. What victims will normally find are high levels of Toxic Metals exposure such as - Arsenic. Several acute and chronic toxic effects of heavy metals affect different body organs. Gastrointestinal and kidney dysfunction, nervous system disorders, skin lesions, vascular damage, immune system dysfunction, birth defects, and cancer are examples of the complications of heavy metals toxic effects. This can be from traces of Implants & their coatings into the Bloodstream, radiation exposure & direct poisoning as attackers can release chemicals into the blood-stream using Hydrogel sensors.

**Amino Acids Profile** - Detects high & or low levels. Due to the effects of radiation exposure high &/or low levels of various Amino Acids such as - Tryptophan can be detected. High levels can cause symptoms such as vomiting & digestive issues. Amino acid deficiency can result in decreased immunity, digestive problems, depression, fertility issues, lower mental alertness, and many other health issues. Each of the essential amino acids plays a different role in the body, and the symptoms of deficiency vary accordingly. Amino Acids are needed for vital processes like the building of proteins and synthesis of hormones and neurotransmitters. When protein molecules are degraded there are a variety of products and also many amino-acids are degraded.

**GPL Mycotox / Mycotoxins Profile** - Detects exposure to Molds. This could be from radiation or direct poisoning via hydrogel sensors in the bloodstream. If you live in a property with Mold or black mold this could be shown in the results. It can cause irritation, lung irritation, sickness, head-aches, skin rash & coughing.

**Toxic Organic Chemical Exposure Profile / Toxic Non-Metal Chemical Profile** -

Tests for exposure to toxic chemicals. Victims may find that highly toxic chemicals are in their systems from RF exposure, traces from Implants & their coatings & from direct poisoning with the use of Hydrogel sensors. Examples of chemicals which may be found are Rocket fuel related, Agent Orange, Pesticides, Industrial, Agricultural & possibly Military grade. Toxins such as these can cause organ failure, immune system disorders, cancer & more.

**These kits above can be found at & their sites are International -**

[Directlabs.com](http://Directlabs.com)

[Doctorsdata.com](http://Doctorsdata.com)

[Greatplainslabrotory.com](http://Greatplainslabrotory.com)

[Biolab.co.uk](http://Biolab.co.uk)

[Embracingnutrition.co.uk](http://Embracingnutrition.co.uk)

**Some are done with Urine samples & others Hair.**

**There are other sites similar. These particular sites are the most popular worldwide.**

Most of these websites will ship Urine & Hair test kits to other countries.

**Bloods would need to be done in your own country as blood test kits cannot be sent overseas. For those who live in the USA these tests can be found at the weblinks listed.**

**These blood tests translate to other countries. You would need to research the names & how to get them depending on your country's health care system. Or use a private hospital. Or look into any other ways specific to your country of residence.**

The websites listed have descriptions regarding the blood & hair / urine kits.

Not all victims will get the same results.

Not all victims will get evidence from each test.

**It is best to start off with the Toxic Metals & Toxic Chemicals tests. If the results come back as abnormal this is an indicator to then move on & try the bloods.**

**\*Consult with your personal physician, prior to taking any test(s).\***
